

(a) Adverse Weather Degradations

Real-world driving scenes contain diverse and mixed weather degradations

(b) Single-Task Restoration Models

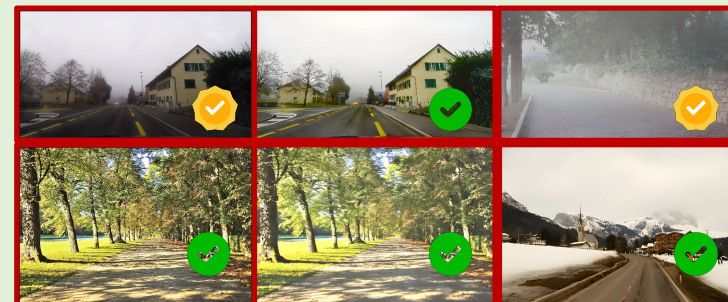

DCP

NAFNET

Restormer

- ✗ Cannot handle multiple weather degradations
- ✗ Incomplete artifact removal

(c) Unified Restoration Models

Onerestore

JarvisIR

AdaIR

- ✓ Better handling of multiple degradations
- ✗ Increased model complexity

(d) OmniRestore (Ours)

- ✓ Better handling of multiple degradations
- ✓ High parameter efficiency

(e) Efficiency-Performance Comparison
